PROFESSIONAL SUMMARY

Aspiring SOC Analyst focused on AI-assisted threat detection, SIEM monitoring, and security automation. Hands-on experience building Splunk dashboards, brute-force detection workflows, and Python-based log analysis tools. Passionate about modern SOC operations, incident response, and AI-driven cybersecurity workflows with active project development on GitHub and cybersecurity research published on Medium.

TECHNICAL SKILLS

Security & SOC: Splunk SIEM, Threat Detection, Log Analysis, Incident Response, Authentication Monitoring, Alert Triage, Brute Force Detection, Security Monitoring, Risk Analysis, SOC Workflows

Programming & Scripting: Python, SQL, JavaScript, C++, Java

Tools & Platforms: Git/GitHub, Linux, Wireshark, TryHackMe, Active Directory, Jira, Power BI

Web & Databases: React, Node.js, HTML, CSS, MongoDB

CYBERSECURITY PROJECTS

AI-Assisted Log Analyzer | *Python, Regex, Security Automation*

- Built a Python-based security log analyzer to detect brute-force login attempts from SSH authentication logs.
- Used regex and automated risk classification to identify suspicious IP activity and assign severity levels.
- Generated SOC-style investigation reports with detection summaries and remediation recommendations.
- Simulated AI-assisted security workflows focused on automated threat analysis and alert prioritization.

SOC Log Monitoring Dashboard | *Splunk SIEM*

- Developed Splunk dashboards for monitoring authentication activity, failed logins, and suspicious access attempts.
- Created SPL queries to visualize failed login trends, targeted usernames, and high-risk IP addresses.
- Simulated real-world SOC monitoring workflows through dashboard-based threat visibility and alert analysis.
- Improved understanding of SIEM operations, security monitoring, and incident investigation processes.

Brute Force Detection Alert System | *Splunk, SPL*

- Designed and configured Splunk alerts to detect brute-force authentication attempts using SPL queries.
- Implemented threshold-based detection logic to identify repeated failed login activity from suspicious IPs.
- Simulated automated SOC alert escalation workflows for faster threat identification and investigation.
- Applied detection engineering concepts to improve visibility into authentication-based attack patterns.

SOC Incident Response Playbook | *Incident Response, Threat Analysis*

- Created a SOC incident response playbook documenting investigation workflows for brute-force attack scenarios.
- Developed structured incident reports including severity analysis, detection timelines, affected systems, and remediation recommendations.
- Simulated analyst-driven investigation and response procedures aligned with SOC operational practices.
- Strengthened understanding of incident triage, escalation, and response coordination workflows.

EXPERIENCE

Shri Luna Ventures LLC - Irving, TX

Data Analyst Intern | Jan 2025 - Nov 2025

- Collected, validated, and analyzed operational datasets to identify anomalies, trends, and actionable insights.
- Developed Power BI dashboards supporting reporting, performance monitoring, and data-driven decision-making.
- Conducted data quality checks and coordinated with stakeholders to support reporting accuracy and workflow efficiency.

IT Help Desk Assistant | Aug 2024 - Dec 2024

- Supported Windows-based systems, user account management, and technical troubleshooting workflows.
- Assisted users with password resets, account lockouts, and access-related issues following IT security procedures.
- Processed and documented technical support tickets while escalating complex issues to senior support teams.
- Helped troubleshoot hardware, software, and basic network connectivity issues to reduce operational downtime.

EDUCATION

University of North Texas - Denton, TX

Bachelor of Science in Information Technology

Dallas College — Dallas, TX | Dec 2024

Associate of Science

Relevant Coursework: Cybersecurity Fundamentals, Computer Networking, Security Operations & Monitoring, Operating Systems, Database Systems, Risk Management

CERTIFICATIONS & LEARNING

- Google Foundations of Cybersecurity – Coursera
- Google AI Fundamentals – Coursera
- CompTIA Security+ (In Progress)
- TryHackMe SOC Level 1 Path
- Mastercard Cybersecurity Job Simulation
- Tata Cybersecurity Job Simulation
- Datacom Cybersecurity Job Simulation
